

Michigan E-85 Refueling Sites

Michigan Biomass Energy Program

An objective of the Michigan Biomass Energy Program is to assist with the establishment of an ethanol refueling infrastructure in Michigan. Michigan currently has 2 refueling sites, located in Lansing and Rochester Hills. We encourage drivers of flexible fueled vehicles (FFVs) to refuel with E-85 whenever possible at these existing refueling sites and to watch this page for openings of new public sites. Do you own an FFV? Click [here](#) for information on FFVs.

Lansing

- Don's Windmill Truck Stop at
7262 Lansing Road
517-646-0717

Rochester Hills

- B.P. Amoco at
3841 S. Rochester Road
248-852-5692

Note: Listings based on information available as of April 2005. All E-85 flexible fuel vehicles (FFV) have a decal on the fuel door that states the vehicle can use both E-85 and unleaded gasoline fuel. Check for this indication on your fuel door and/or check the vehicle owner's manual before using E-85 fuel.
